

Product Story

HawksDB will allow users a shopping experience to filter their desired candidates, experience their portfolio, setup interview and finalize the hiring process in the same system. This database system can generate and support hiring process for the medium to big enterprise.

Features

1. Dynamic filtering
2. Automatic resume generation and match with the available resume available in the database
3. Select candidates for interview
4. Online and offline interview setup
5. Select the final candidates after interview

Customization

The system needs to be customized according the business, sales and revenue model of the business in order to get the maximum output from the system.

Technology

Based on the level of usage and purpose we have necessary resources to customize the back end using JAVA, .NET, Ruby & PHP different frameworks; iOS, Android.

Target Users

Small to big size business in education industry that operate in different locations.

TeamSourcing Service

We can provide part-time, dedicated back office virtual assistant to support day-to-day activities e.g. maintenance, updates, repetitive tasks, programming, server maintenance and updates, web and E-marketing, sales database, research and report creation.
