Product Story

HawksConnect is an experience-based social network system that creates user profiles based on their daily experience. User hash tags their experience into the system and also can seek information from an experienced user searching into the system using keywords. Both information seeker and experienced users can interact via text, generate direct calls from the system, or Skype if the experienced user allows his profile to be visible publicly or allow him to be accessed by other users.

Features

We designed this system not to add more features, but focused on the most used functions and usability for the users. In daily life we don't use a lots of functionality.

1. Free call service domestic and international, restricted by a limited number of calls per months
2. User can restrict the level of access to his network in a very detail level
3. Export data in Excel, .pdf format
4. Support mobile, iOS and Android Operating System

Customization

System level modification is not required unless it is for private use of this system to run internal operations.

Technology

Based on the level of usage and purpose we have necessary resources to customize the back end using JAVA, .NET, Ruby & PHP different frameworks; iOS, Android

Target Users

Small or big size organizations to provide cloud-based single communication channel to their employees free of cost.

TeamSourcing Service

Furthermore, we can provide a part-time, dedicated virtual email marketing assistant free of cost if the client uses our system.
