Hawks Hierarchy

Product Story

This system is for strategic business decision and task management process for the top and managerial level. We found a gap that very few system available in the market that focus on the strategic decision making for business level and follow up in task level that is integrated in one single platform. HawksHierarchy will reduce that gap between the management decision and implementation follow up for any specific business.

The whole system is organization hierarchy based that define the roles and responsibilities from the very beginning for the users to accomplish their goal together as a team into one single platform. Time to time the system will learn the activities and actions done by each user and act upon based on the desired action defined by the users into the system.

Features

1. Hierarchy based, absolutely data driven, system learn the user based on the hierarchy and assist the user to accomplish the goal set by the team together in the system.

2. Simple user interface, very focused and easy to use, this system will handle only tasks and keep track on the relevant users to accomplish the task to reach the strategic goal.

3. This system will keep track all relevant key stakeholders to accomplish the strategic goal. Time-to-time we can add remove the users based on the business goals and team formation to achieve the specific goal.

4. Export data in excel, pdf format

5. Support mobile, iOS and Android Operating System

Customization
The basic system can be use as it is. We strongly recommend the companies to take our assistance to setup

and training the system and do necessary modification to utilize the system at fullest.

Technology

Based on the level of usage and purpose we have necessary resources to customize the back end using JAVA, dot NET, Ruby & PHP different frameworks; iOS, Android
